Calm Talk	$2.99	Pre-operational stage and up	Audio/ Visual	English	None	None

Calm Talk provides relaxation activities. It offers a water timer to support an individual who has difficulty transitioning between activities. It uses sentence completion tasks to help the individual communicate feelings and needs (e.g., "I feel___).   The relaxation activities include: popping bubble wrap, drawing in sand, a calming balloon, and an appealing scene with relaxing music. Mayer Johnson Boardmaker symbols are used within this APP.

Breathe, Think, Do	Free	Pre-Operational stage and up	Audio/ Visual	English Spanish	Visual and Verbal	4.5 Stars

Breathe, Think, Do with Sesame Street provides the opportunity to practice problem solving skills. It depicts a Sesame Street monster that requires user interaction in order to have the monster appropriately model the expression of emotions such as anger or frustration. This includes prompts to touch the monster's stomach to help take deep breaths. Subsequently, the monster's cheeks decrease in color showing how the deep breaths help the monster to calm down. Another relaxation simulation is popping bubbles on the screen. This activity provides auditory and visual reinforcement which can hold the child's attention and motivation. The APP also provides various scenarios that evoke a specific feeling from the monster and requires the child to help solve the presented problem.

Emotions	Free	Concrete operational and up	Audio/ Visual	English	Audio/Visual/V erbal	4 Stars

Emotions is an APP that states an emotion and asks the child to identify which pre-programmed face matches the emotion. This APP requires understanding of the emotions and an advanced ability to recognize emotions on other individuals. The APP will give a sound if incorrect and when the correct face is chosen it gives verbal reinforcement and a check mark on the face.
